

# Zen Garden

During the reign of evil Wu-Feng, many families lost their sons and daughters to the Lord of the Nine Hells. Still, only few speak of the cruelties happening in the Zen Garden that day, and even fewer know the truth about the young woman sacrificing her life for the sake of others.

The Sun family remembers. Mizuki had been their first-born. They know that their beautiful daughter is still helping to keep the balance between the living and the dead, even from the other side – as they are doing, protecting the Armor of the Just...

The „Zen Garden“ is an additional village tile and can be used in combination with the base game or any expansions.

**Setup:** Attach the two zen markers to the blank stand-up marker, a wooden chip or another token of your choice.

**Rules:** When you request help from Mizuki, you may place the zen token (see Setup) on a ghost or move it to a different ghost. That ghost cannot use its Central Stone power(s) as long as the zen token stays on the ghost. The ghost must still be exorcised as normal.
